PALM JUMEIRAH

On our own doorstep

Palm Jumeirah recorded 563 registered sales in H1 at an average of AED 3,711 per sq ft, about 2.1 times the Dubai average. 34% of the Palm's 2026 sales are off-plan, against 72% across the city, and the median sale price is AED 5.75M.

Palm Jumeirah registered sales by month; median price per sq ft in AED under each month. Monthly medians move with the mix of homes sold: a month with several large villas lifts the figure.

About these figures

All figures are taken from the Dubai Land Department's open data on registered residential sales, as published up to 2026-10-10. They cover homes sold in 2026, ready and off-plan; rentals, land, offices, shops and hotel rooms are excluded, as are sales with an implausible price or area. Price per sq ft is calculated from the registered price and the registered area of each sale. Monthly figures are medians; a half-year figure averages the six monthly medians, weighted by sales. Median price and off-plan share cover 2026 up to the date above. Areas follow the Dubai Land Department's own area names, grouped into the communities used on dubairapidproperties.com. Areas with fewer than 50 sales in H1 are left out of the tables.

This report is general market information and not investment, legal or tax advice. Past sales do not predict future prices.
